

BACHELOR THESIS

CFD analysis of a single-phase non-Newtonian model of blood in a diseased artery

Author:

Ruben BIESHEUVEL

Supervisor:

Dr. S. KENJERES

TU Delft
Faculty of Applied Sciences

November 3, 2014

Abstract

Contents

1	introduction	1
2	Theory	2
3	Numerical set-up	2
4	Results	2
5	Conclusion	2

1 introduction

This is the introduction.

2 Theory

Things about Navier-Stokes and all the other things regarding the theory of CFD will be shown here.

3 Numerical set-up

This is the chapter on the experimental set-up.

4 Results

Colorful fluid dynamics images will be shown here.

5 Conclusion
